Dr. Spencer Barzee
Deputy Superintendent
Idaho Department of Education

Dear Dr. Barzee,

Upon your email request on October 2, 2026, please find the following as a summary of the Clark County Jr/Sr High School accreditation history with Cognia.

Clark County Jr/Sr High School has maintained continuous accredited status for decades, with accreditation records dating back to July 1, 1973. Between 2012 and 2016, several accreditation entries reflect administrative actions taken to align accreditation expiration dates across NWAC schools. A significant milestone occurred during the 2013-14 review cycle when the school successfully completed its External Review and was recommended by the State Council for advancement from candidate status to full accreditation, resulting in accreditation approval in 2014. The school also successfully completed its 2015 Annual Progress Report, which was approved by the State Council. Subsequent commission actions updated accreditation terms and expiration dates, maintaining the school's accredited standing. In June 2019, the school earned an IEQ score of 292.00 and received accreditation through June 30, 2026. Most recently, a commission action in June 2026 further extended the accreditation expiration date to June 30, 2032. Overall, the record demonstrates a long history of continuous accreditation, successful external reviews, positive commission decisions, and sustained compliance with Cognia accreditation standards.

Sincerely,

Dr. Michael Garrett
Director, Accreditation and Certification Services, Cognia
